MC Squared Energy Services (MC2) Honors 50th Anniversary of Earth Day With Unique 100% Green Initiative

- MC2 will retire Midwest generated Renewable Energy Certificates (RECs) equal to 100 percent of its customers' energy consumption to celebrate the 50th Anniversary of Earth Day
- MC2 supports the development of sustainable renewable generation resources in the Midwest
- An equivalent to over 3,000 metric tons of CO₂ will be eliminated from the atmosphere

CHICAGO, April 15, 2020 (GLOBE NEWSWIRE) -- [MC Squared Energy Services, LLC](#) (MC2), a leading retail electric supply company located in the heart of Chicago will celebrate and honor the 50th anniversary of Earth Day in a unique way. On Wednesday April 22, MC2 will retire Midwest-based Green-e[®] certified Wind Renewable Energy Certificates (RECs) equal to 100 percent of the energy consumption during this day. This includes all residential, commercial, educational and governmental customers served by MC2 in Illinois and Ohio, states in which the company is a certified retail electric supplier. These RECs are in addition to existing state mandated Renewable Portfolio Standard (RPS) requirements.

Chuck Sutton, MC2 founder and president, said he was looking for a unique way to celebrate the 50th anniversary of Earth Day, a worldwide event established in 1970 to demonstrate support for environmental protection. On Earth Day 2020 MC2 is projected to retire renewable energy certificates equivalent to over 3,000 metric tons of CO₂ eliminated from the atmosphere. Sutton says the company is excited to do

its part to help reduce the world's carbon footprint. "Our efforts to reduce carbon emissions on the 50th anniversary of Earth Day is just one way we as company can demonstrate our commitment to make the planet we live in a better and safer place for all of our customers."

MC Squared Energy Services offers electricity supply products and services that are backed by RECs as a way for customers to support the reduction of harmful emissions and help the environment. A REC represents 1 megawatt-hour (MWh) of electricity that has been generated from a renewable energy source. Each REC retired by MC Squared is backed by Green-e[®], a trusted global leader in energy certification.

To bolster its environmental commitment, MC Squared Energy Services proudly offers its EcoGreen Power Supply Program. The program is designed to give customers the opportunity to support renewable energy backed by 100 percent Wind Green-e certified RECs. The MC2 EcoGreen Power Program is Green-e[®] Energy certified and meets the environmental and consumer protection standards established by the nonprofit Center for Resource Solutions. For more information on Green-e[®], visit <https://www.green-e.org/>. For more information on MC Squared Energy Services and its EcoGreen Power Program, visit www.mc2energyservices.com.
