## Kick Off the Summer With JULIE

Summer is a great time to update your landscaping or start a new project. Don't forget to call JULIE before any digging to avoid striking underground utility lines in your yard. JULIE is a free service, available to everyone. Call 811 two days prior to starting your project to have any underground utility lines in your yard marked for no charge.

JULIE also offers a new self-service option. JULIE's new E-Request allows homeowners and contractors to submit a request online. It's a quick and easy alternative that's available at all hours. All you need is a valid e-mail and home address to complete the online form. You will then receive a confirmation email with your dig start date and time.

Call **811** or Click Before You Dig.  
It's a Free Service.

Whether by phone or online, contact JULIE to keep your family and community safe this summer.

### 4 Wrong Reasons to Not Call JULIE:

1. I already knew where the utilities are. *Are you sure? Contacting JULIE is free.*
2. I'm redoing a similar project in the same place. *By going a little deeper or to the side, you could hit a line. Might as well be safe.*
3. I'm not digging deep enough. *Depths can vary over time and lines can get closer to the surface without you knowing it.*
4. I'm not working in an area that needs marking. *Don't take the chance. Be safe before it's too late.*

## Chicago — the Largest U.S. City Committed to Clean Energy

With legislation that passed on April 10, 2019, Chicago joined 118 other cities across the globe who have committed to a goal of 100-percent clean energy. The CTA, the country's second-largest public transportation system, will electrify more than 1,850 buses by 2040. As the third-largest city in the country, Chicago has the opportunity to make a significant impact on the environment. Increasing the use of clean energy resources like wind and solar will help decrease pollution levels and related problems, such as Chicago's high asthma rate.
