MC SQUARED ENERGY SERVICES (MC2) CELEBRATES EARTH DAY 2023 WITH ANNUAL GREEN INITIATIVE

- To celebrate Earth Day 2023, on Saturday, April 22, MC2 will retire Midwest-generated Renewable Energy Certificates (RECs) equal to 100% of the energy its customers consume this day.
- This amount is equivalent to eliminating more than 2,200 metric tons of CO₂ from the atmosphere.
- MC2 continuously supports the development of renewable generation resources in the Midwest.

Chicago, IL – (April 18, 2023) – [MC Squared Energy Services, LLC \(MC2\)](#), a Chicago based retail electric supplier, will celebrate Earth Day 2023 with their annual green initiative. On Saturday, April 22, MC2 will retire Midwest-based wind Renewable Energy Certificates (RECs) equal to 100% of this day's energy consumption of its entire client base. This includes all residential, commercial, educational, and governmental customers served by MC2 in Illinois and Ohio, states in which the company is a certified retail electric supplier. These RECs are in addition to existing state-mandated Renewable Portfolio Standard (RPS) compliance requirements.

On Earth Day 2023, MC2 is projected to retire wind-generated renewable energy certificates equivalent to eliminating more than 2,200 metric tons of CO₂ from the atmosphere. "We are excited to celebrate Earth Day for a 5th consecutive year by supporting clean, renewable energy resources" states MC2 founder and president, Chuck Sutton.

MC Squared Energy Services offers electricity supply products and services that are backed by RECs as a way for customers to support the reduction of harmful emissions and help the environment. An REC represents 1,000 kilowatt-hours of electricity that has been generated from a renewable energy source.

Striving to build a sustainable future, MC Squared Energy Services proudly offers its *EcoGreen* Power Supply Program and Community Solar Savings Program as easy opportunities for its customers to support renewable energy generation resources.
