Happy Earth Day! mc² Celebrates 50th Anniversary of Earth Day With 100% Green Initiative

MC Squared Energy (mc²) is celebrating Earth Day's 50th Anniversary this year with a unique 100% green initiative. On Earth Day, April 22, 2020, mc² will retire Midwest-based Green-e[®] certified Wind Renewable Energy Certificates (RECs) equal to 100 percent of the energy consumed that day by our customers. This will include all residential, commercial, educational and governmental customers that mc² serves in Illinois and Ohio, states in which we are a certified retail electric supplier.

One REC represents one megawatt-hour (MWh) of electricity that has been generated from a renewable energy source. Each REC retired by mc² is backed by Green-e[®] Energy, a trusted global leader in energy certification.

On Earth Day alone, mc² is projected to retire renewable energy certificates equivalent to eliminating over 3,000 metric tons of CO² from the atmosphere. We at mc² are excited to do our part to help reduce the world's carbon footprint. This Earth Day initiative is just one way we can demonstrate our commitment to make the planet we live in a better, safer place for all of our customers.

Illinois Required Disclosure (ComEd Service Area)

MC Squared Energy Services, LLC (mc²) is not the same entity as your electric delivery company. You are not required to enroll with mc². As of April 2020, the electric supply price to compare to is currently 7.175 cents per kWh. The electric utility electric supply price will expire in May 2020. The utility electric supply price to compare does not include the purchased electricity adjustment factor (PEA). For more information, go to the Illinois Commerce Commission's free website at www.pluginillinois.org. The purchased electricity adjustment factor may range between +.5 cents and -.5 cents per kilowatt-hour.
